Quick Start Guide
WDG110 series

Westinghouse

Dear Customer,

Thank you for purchasing a Westinghouse appliance. You have chosen a product that comes from a history of durable and reliable products loved by many families. We look to help you make the most of your time at home, so you can spend your time doing what you really love, with the ones you love.

Welcome to Westinghouse.

Ready

This is a Quick Start Guide. Please refer to user manual online for detailed information and installation

To access your detailed user manual online, simply scan the QR code on your smart phone.

For more detailed information and installation guide refer to user manuals at westinghouse.com.au/manuals

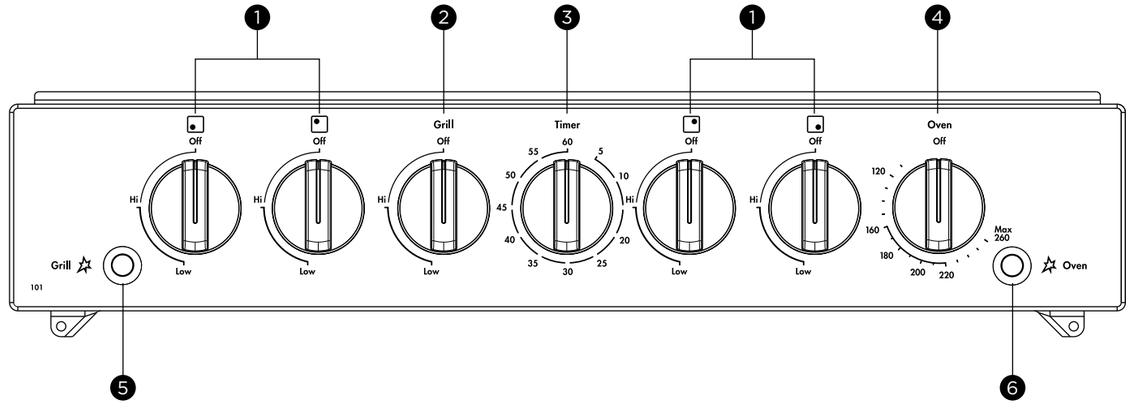

Before you start, please make sure:

- ☐ Your cooker has been correctly installed by a qualified person.
- ☐ Your cooker has power and is switched on.
- ☐ You've removed all relevant packaging.

Most of the packaging materials can be recycled. Please dispose of them at your local recycling centre or in your own recycling bin.

Set...

Get to know the control panel:

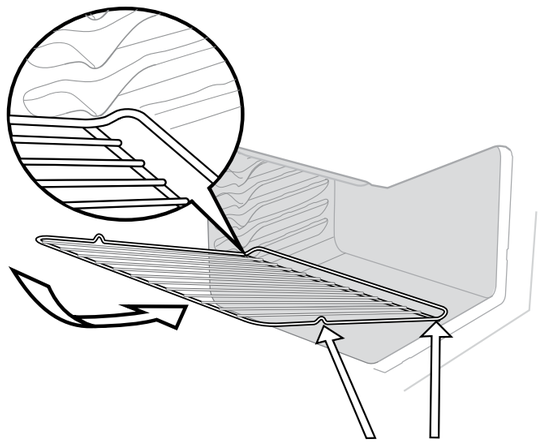

1 Burner control knob
2 Grill temperature control knob
3 60 minute timer
4 Oven temperature control knob
5 Grill piezo ignitor
6 Oven piezo ignitor

Set...

Installing the accessories

Fitting the oven shelves

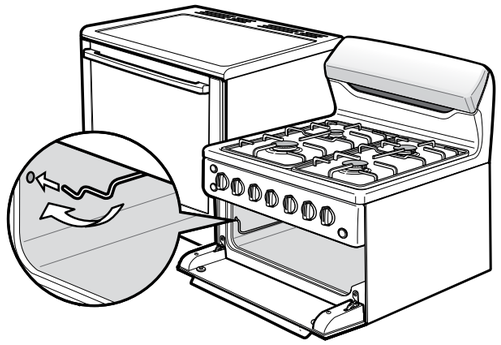

1. Ensure shelf orientation is correct (refer to diagram below).
2. Slide oven shelves onto oven supports (side runners) at an angle until raised back of shelf is past the stop on oven supports (side runners).
3. Lower front of shelf and push in until stop is reached.
4. To remove oven shelves, withdraw to the stop and raise the front of shelf to clear the stop.

Note the orientation of the side and rear features

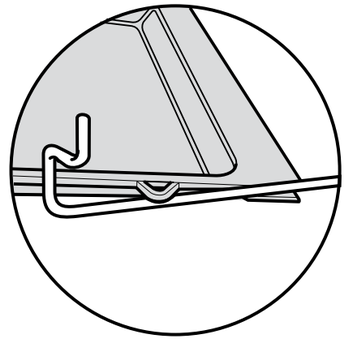

Fitting the grill dish supports

Insert the ends of the supports into the holes and swing downwards.

Fitting the grill dish

Ensure rear of the dish is engaged with the side support before sliding backwards. To remove simply pull forwards and upwards.

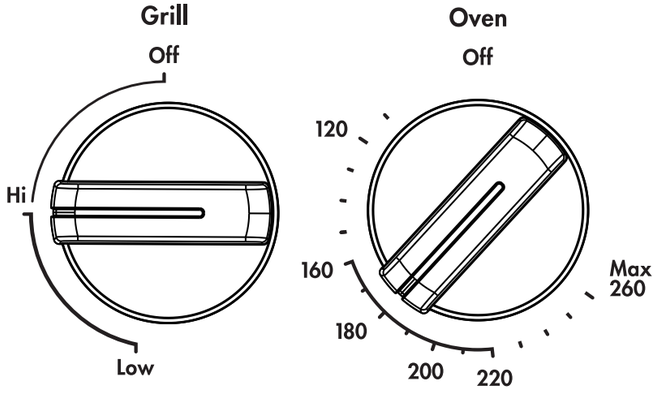

Engagement of rear of dish

Condition the oven

(to burn off any residue)

New appliances can have oil or residue left from manufacturing. You will need to heat your oven for 30 minutes before using it for the first time.

1. Using the oven control knob, set the oven at 180°C for approximately 30 minutes. Later, run the grill on maximum for 15 minutes with the grill door open. Please ensure the room is well ventilated during this process.

Go!

You're ready to use your new Westinghouse appliance. A few tips from us:

☐ **Remember to pre-heat each time.**

For best cooking results pre-heat the oven. Pre-heating allows the oven to reach the required temperature quickly and efficiently as well as cook food at the correct temperature for the entire cook time. Recommended pre-heat time is 30 minutes for baking and 3 minutes for grilling.

Lighting gas hotplate, grill and oven

Hotplate Ignition – (Manual)

To light a burner, depress the corresponding knob fully and while continuing to depress the knob approximately 5 seconds, turn anti-clockwise to 'HI' position. At the same time, hold hand-ignitor next to the burner and ignite (hand-ignitors not supplied). The flame sensor must warm up in order for the flame to stay alight.

Grill Ignition – Piezo

Depress the grill control knob fully and while continuing to depress the knob for approximately 5 seconds, turn anti-clockwise to 'HI' position. The flame sensor must warm up in order for the flame to stay alight.

Oven Ignition – Piezo

With the left hand push and hold the Oven Control Knob in and turn it a quarter of the way anti-clockwise. Keep the oven Control Knob pushed in firmly and at the same time push the Oven Piezo Ignitor button on the right hand side of the control panel (several times if necessary). It will make a loud 'clack' noise as the Piezo mechanism creates a spark. Hold control knob in for 15 seconds after ignition.

☐ **Choose the right program for the best result:**

OVEN	In a convectional electric oven, heat comes from two elements, one above and one below the food. The bottom element is hidden below the floor of the oven. The centre shelf is ideal for baking at precise temperatures.
GRILL	When it comes to cooking tender cuts of meat, steak, chops, sausages, fish, cheese toasties and other quick cooking foods, the grill setting will give you the best results. Pre-heating your grill for 3 minutes will help in sealing in the natural juices of the food for better flavour. For separate grill models, grill with the grill door open.

Refer to your full user manual for more details on oven functions.

☐ **Set your temperature**

- To set the temperature, turn the grill/oven knob in an anti-clockwise direction to the desired setting.
- Once the food is cooked, turn the temperature selector back in a clockwise direction.

☐ **Set a Timer**

- The 60 minute timer (where fitted) sets a reminder time.
- When the timer returns to zero, the timer will give a short ring.

NOTE: For any time below 15 minutes, turn knob past 15 minutes, then back to required time setting.
